ABSTRACT

Data on the grade point ratios (GPR's) and the distribution of grades earned were gathered and analyzed for all students enrolled in credit courses at the seven Hawaii community colleges during Fall 1978. These data indicate that the average assigned grade was 2.7, and that the credits-earned rate was 71%. As in previous semesters, the credits-earned rates were higher for vocational courses (75%) than for general education courses (69%). Rates ranged from 66% in the natural sciences to 85% in hotel and restaurant courses. Of the assigned grades, 3% were credit/no-credit designations; 21% were non-punitive grades (W for withdrawal or N for incomplete); 5% were F's; and 23% were A's. Proportionately fewer A's and B's were given than in previous years, and more F's were assigned at those campuses which give failing grades. The mean GPR of 2.74 had steadily declined since Fall 1975, when it was 2.87. Both liberal arts majors and vocational education majors earned the same average GPR of 2.73. Unclassified students earned the highest GPR's, probably because they carried lighter credit loads. Tables organizing data by campus and program area are provided in the study report. (JP)

GRADE DISTRIBUTION
COMMUNITY COLLEGES
Fall 1978

Introduction

This brief report is a summary of data on current grade point ratios earned by students, by program, as well as the distribution of grades assigned in the various subject areas. Such information is helpful in examining campus grading practices and in planning and assessing academic programs.

Source

Computer reports 2528 and 2529 were used as the source documents for this report. (These reports are on file in the registrar's office at each campus.) They are generated at the end of each semester after all of the grades have been submitted. The printouts contain data by specific programs and subject areas.

Population Included

The data include the grades given to and earned by all students registered for credit classes, i.e., regular students, special students (early admits and concurrent registrants), students in credit courses offered by continuing education as well as students who registered for the first time in the second-eight week session.

Highlights

Tables I and II: Distribution of Grades and Average Grades Assigned

1. Community college totals for Fall 1978 show:
   a. The average grade assigned this fall was 2.7. The data show that the average grade assigned has been declining since Fall 1975 (2.9).
   b. The credits-earned rate was 71 percent. As in previous semesters:
      (1) credits-earned rates were higher for vocational courses (75 percent) than for general education courses (69 percent);
      (2) rates ranged from 66 percent (natural science courses) to 85 percent (hotel & restaurant courses), by subject area.
   c. Three percent of the grades this fall were credit/no-credit designations. (They comprised 2-4 percent of the grades in previous semesters.)

d. A varying pattern for the two forms of non-punitive grades given by the colleges: the "W" and "N" grade designations.

(1) "W" designations comprised 10 percent of the grades.

(2) "N" grades comprised 11 percent of all grades assigned, compared to 13 percent last fall. Over half of these "N" grades were in transfer courses (courses numbered 100 and over).

e. "F" grades increased to 5 percent (3 percent in previous years). Five campuses gave "F" grades. The proportion of "F" grades ranged from 1 to 12 percent.

f. Proportionately fewer "A" grades were assigned (23 percent compared to 24-25 percent in previous semesters).

2. The data, by college, show:

a. Average grades given ranged from 2.5 to 3.1.

b. Credits-earned rates decreased at six campuses. The rate of decline ranged from 1 to 6 percent.

Table III: Current GPRs by Major and Educational Objective:

The current mean GPR of 2.74 earned by community college students is the lowest since Fall 1975 (2.87). Both liberal arts and vocational education majors had the same GPR of 2.73. (Data in previous semesters show liberal arts students with higher GPR's than vocational education students.) Unclassified students earned the highest GPR's, probably due to the lighter credit loads.

Summary

The data for this past fall semester indicate a continuing shift toward more stringent grading practices, i.e., proportionately fewer A's and B's were given and average grades and average GPAs were lower than in previous years. Conversely, more F grades were given at those campuses which give F grades. To what extent do the data show a shift in the grading philosophy at our campuses?
